

ALE

RiX traceability ...

LOOKING AFTER YOUR DATA

" Production reports, batch codes, labels, TTF, CIJs, Lasers, all in one simple package "

Each file can contain up to 16 messages. Select from printer keypad or RiX.

Report output in CSV and TXT file format for your database.

- 16 print stations: Primary, Carton, Pallet coders
- Single point of control, Ethernet or RS232 linked
- Batch codes, counters, print quantities
- Compatible with ALE hi-res printers
- Compatible with all industrial printers AND office printers (using standard Windows drivers)
- Compatible with "text mode" coders - CIJ, Laser, DOD ...
- Real-time labels
- Graphics and variable fields

Enter text batch data directly or have it automatically applied with incrementing or database methods.

Its simple!. Design your Labels in Codex. Save them. Select them in RiX. For "Text Mode" printers (like CIJs and Lasers), Codex label only Batch and text data is sent to the printer.

CODEX image design software

Message creating software :

- Open protocol
- Dynamic view in 3D
- Any size images
- Exceptionally easy to use
